

2KM Proposal Status

- Recent Work has concentrated on budget and N/F and nonQE studies
 - More detailed budget numbers for the proposal including details of the Civil construction, PMT/cable costs MRD etc.
- One section that is missing is proposal is N/F studies and non-QE measurement.
 - Maxim has been studying the N/F ratios using 2KM WC & SK
 - Anselmo has been working on nonQE measurements using lAr.

New things being worked on

- Discussion with Bonnie and Elena about strange quark content of the proton measurement using lAR.
- Naho is starting to study the BG from entering in time muons to determine the need for OD tubes.
- TJ now has made Qscan lAr program read the G4 output files.
